Goals Table - Goal Model with iStar 2.0								
System	**Domain**	**Actors**	**Tasks - System**	**Qualities - System**	**Goals - Linked Data**	**Qualities - Linked Data**	**Taks - Linked Data**	**Resources - Linked Data**
C2D - UFES	Education	C2D - UFES	Calculate reseracher score	Automated work	Scores published in linked data			
				Word time reduced				
			Manage venues		Venes published in linked data		Generate RDF	D2RQ
			Manage publications		Publications published in linked data		Choose Vocabulary	LOV - Linked Open Vocabularies
			Manage researchers		Researchers published in linked data		Generate OWL	Menthor
			Manage and authenticate users	Access security	Users not published in linked data		Create Ontology	
					Data published in linked data	Keep Transparency	Publish with FrameWeb-LD	
						Easier access to data		
		Community			**Search information in linled data (by Community)**			
Sub total			**2**	**5**	**3**	**7**	**2**	**5**	**3**

System	Domain	Actors	Tasks - System	Qualities - System	Goals - Linked Data	Qualities - Linked Data	Taks - Linked Data	Resources - Linked Data
Tranparency Portal	Governamental Data and Economy	Manage Invenstiment	Manage Payment		Payments published in linked data			
			Manage public agengy		Public agency published in linked data			
			Manage expense element		Expense published in linked data			
			Manage expense sub element					
							Generate RDF	D2RQ
			Manage provider		Providers published in linked data		Choose Vocabulary	Data Cube
			Manage investiment		Investiments published in linked data		Generate OWL	Protégé
					Goverment expenses published in linked data	Interoperability	Publish with FrameWeb-LD	UK Payment Ontology
						Keep Transparency		
						Inteligibility		
						Growth of social control		
		Transparency Portal			**Goverment data consumed (by Transparency portal)**			
Sub total		**2**	**6**	**0**	**7**	**4**	**4**	**4**

System	Domain	Actors	Tasks - System	Qualities - System	Goals - Linked Data	Qualities - Linked Data	Taks - Linked Data	Resources - Linked Data
TravelMN	Geographical - Travel agency	Travel MN	Manage cities		Cities published in linked data			
			Manage customers		Customers not published in linked data			
			Manage purchased packages		Purchased packages not published in linked data		Create Vocabulary	
			Manage and authenticate users	Access security	Users not published in linked data		Choose Vocabulary	LOV - Linked Open Vocabularies
			Manage packages		Packages published in linked data		Generate RDF	DotNet RDF
					Data published in linked data	Data available for agents	Create Ontology	Protégé
						More expressibity	Generate OWL	
					Packages and cities stored in triple store		Store data in linked data	Stardog
		Agent (Ex. Trivago, Expedia)			**Process data in Linked Data (by Agent)**			
Sub total		**2**	**5**	**1**	**8**	**2**	**6**	**4**

System	Domain	Actors	Tasks - System	Qualities - System	Goals - Linked Data	Qualities - Linked Data	Taks - Linked Data	Resources - Linked Data
Semed	Medical - Bio	Semed	Manage drugs		Drugs published in linked data		Search drugs in linked data	Bio2RDF
			Manage diseases		Diseases published in linked data		Search diseases in linked data	
			Manage doctors		Doctors published in linked data		Search cities in linked data	DBPedia OWL
			Manage patients		Patients published in linked data		Generate RDF	Jena
					Medical data published in linked data		Create ontology	Protégé
							Generate OWL	
							Create Vocabulary	
		Medical Community and Patients			**Search medical data in linked data (by Patients and Doctors)**			
Sub total		**3**	**4**	**0**	**6**	**0**	**7**	**4**

System	Domain	Actors	Tasks - System	Qualities - System	Goals - Linked Data	Qualities - Linked Data	Taks - Linked Data	Resources - Linked Data
Rural	Rural	Rural System	Manage rural producer		Locations sales published in linked data	Increase sales by region	Search locations in linked data	DBPedia OWL
			Manage product		Data published in linked data	Disclose sales by location	Choose Vocabulary	OMG Specifications
			Manage rural property					W3C Geo
			Manage locations					DBPedia OWL
			Manage invoice	Comply with local legislation			Generate RDF	Jena
			Manage users	Access security	Users not published in linked		Generate OWL	Protégé
							Create Ontology	
							Create Vocabularuy	
		Rural Community			**Seacher sales by location (by Community)**			
Sub total		**3**	**5**	**2**	**4**	**2**	**6**	**6**
